

# 9 month Radiant Mind course with Peter Fenner, Ph.D.

Three 3-day workshops, 10 conference calls, 12 one-on-one calls,  
50 explorations, in a unique supporting community.

*Peter Fenner's course brings  
the ultimately liberating experience  
of selfless engagement within the reach  
of Western spiritual discoverers.  
I highly recommend it.*

**Robert Thurman, Ph.D.**  
Buddhist Scholar, Columbia University

Radiant Mind programs reveal unconditioned, nondual awareness, the state that lies at the end of all human effort and endeavor. It is called the "ultimate medicine" because it is the only lasting solution to our experience of lack and inadequacy. This work takes you to the end of the spiritual path - to a place of deep silence and natural serenity - revealing the purity and perfection of each moment of existence.

Radiant Mind offers you a precious and profoundly refreshing way of living life and relating to others; a timeless set of skills and sensitivities for achieving sustainable experiences of well-being.

**Peter Fenner Ph.D.** is a leader in the Western adaptation of Buddhist nondual wisdom and a pioneer in the new field of nondual psychotherapy. He was a celibate monk for 9 years in Tibetan Buddhism. Peter radiates a transparent, silent and extraordinary presence.
